The weather was beautiful and over 2,000 people entered the park. The concession stand was open and operated by Full Circle; JB’s Hut and Mo Cheese Food Trucks were there; tattoos, glow sticks, 3D fireworks glasses and U.S. flags were handed out at the entrance for everyone to enjoy. The Teen Angels put on an awesome concert that had everyone singing and dancing along, and to top the night off was the spectacular fireworks celebration held in conjunction with the Grosse Pointe Yacht Club.

A special thank you to all the individuals and Grosse Pointe Shores staff who participated in making this year’s event a huge success!!

GPS Observation Program

Private Video Surveillance Camera Registration
Do you currently have video surveillance at your home? If so, we would like you to become part of the Grosse Pointe Shores Video Observation Program. Video surveillance is one of the best methods to apprehend criminals and convict suspects in the act of committing a crime. Installing video surveillance is an excellent step toward helping to secure and protect your home, but it can also help the police protect your neighborhood.

How does it work?
The GPS is committed to our partnership with residents. Many residents operate
surveillance systems at their businesses and/or homes. As crimes occur nearby, citizens are
not always aware their system may have captured information that could help solve the crime
and keep our community safer. In addition, police are not always aware who may have this
potentially vital information.
The Police Department is asking residents throughout the Village to register their privately
owned surveillance camera systems. If an incident happens in the vicinity of your camera
system, you will be contacted by our detective bureau and we will request that you review
your video to determine if there is any valuable information. There is no requirement to give
access to your video system to the police department.

**What are the benefits of registering your camera?**
By registering, the police department can quickly identify nearby cameras that may have
captured criminal activity. You would only be contacted by the Police Department if there is
an incident in the vicinity of your security camera. Police personnel, if necessary, may
request that you review your camera footage to assist in the investigation and determine if any
part of the incident was captured by your video. If a home is broken into, a car is stolen, or the
worst case of all, a child goes missing, your video may be the difference in a quick resolution
to the incident. A video partnership with our residential community will greatly assist the
police in their investigations.

**Registration**
To register your video surveillance and allow officers to contact you, should an incident occur
in or near where your cameras are installed, we kindly ask you to notify our department clerk
@ 881-5500 so that we can send you a registration form. Public Safety Officers can assist
you if necessary with the completion of the registration form.

**Asking for your help**
If you have purchased a HD video system and you are pleased with the product and service
from the vendor, please let us know so that we can provide that information to other residents
who may be considering the purchase of a video system.
Respectfully,

John J. Schulte
Chief of Police
HELPFUL HINTS FROM YOUR WATER DEPARTMENT

Toilets are the largest culprit for water leaks. Toilets can silently leak in excess of 200 gallons of water in one day! To check your toilet(s) for leaks, perform this simple test; remove the lid from the toilet tank and add a small amount of brightly colored food coloring to the water in the tank. Wait approximately 20 minutes and check the toilet bowl for colored water. If the colored water escaped the tank into the bowl, your toilet is leaking and is in need of repair. Please note: not all toilets can be heard when the water is running/leaking into the bowl. This simple visual test is virtually fool proof.

You can save water by practicing these good habits:

- Turn the tap off while brushing your teeth. This can save up to 8 gallons of water each time a family member brushes their teeth.
- Repair dripping faucets and showerheads. A drip rate of one drip per second can waste more than 3,000 gallons of water per year.
- Showers vs. Baths: A 5 minute shower uses only 10-25 gallons of water, while a full bath tub can require 70 gallons of water.

RECYCLABLES

In addition to metal, glass and plastic containers, GFL Sanitation also picks up household batteries (in plastic bags), and magazines (in bundles) separate from newspapers placed in your recycling bins.

Large recycle bin containers are available for purchase at the GPS Administrative Office for $60 and will be delivered to your home by our DPW Department.
