

On Friday July 31, 2020, the city was informed that a Osius Park employee had tested positive for the Corona virus. This employee has not had any contact with residents using the pool area. The Public Safety Department and City Administration spent the day investigating and tracing the exposure. While we have evidence that the employee has not infected other employees, we are taking precautions to prevent any further spread. Any employee that could possibly be infected will be tested. Effective at 4:00 PM today the Osius Park pool will be closed until further notice.
